ISTRUZIONI E CONSIGLI PER LA PULIZIA E MANUTENZIONE

Per la pulizia quotidiana delle superfici in CORIAN® si possono utilizzare prodotti non molto aggressivi tipo quelli normalmente usati per la pulizia del vetro.

Per una pulizia più approfondita consigliamo l'utilizzo di un detergente neutro a base di ammoniaca che consenta di eliminare eventuali macchie o patine che potrebbero formarsi.

Dopo aver inumidito la superficie con il detergente strofinare con un panno morbido e asciutto esercitando un lieve movimento circolare fino alla completa evaporazione del detergente al fine di rendere uniforme la finitura su tutta la superficie.

Dopo tale operazione procedere ad un passaggio con panno morbido completamente pulito e asciutto per migliorare l'uniformità della finitura.

Per lavabi bagno, periodicamente, a seconda dell'utilizzo, può essere utile riempire il lavabo con acqua e candeggina abbondante lasciando agire per un paio d'ore. Passare poi con del vim in polvere o simile ed una paglietta non troppo aggressiva insistendo su eventuali macchie più ostinate sempre con acqua abbondante.

Soprattutto nei lavabi, è facile riscontrare dopo un certo periodo d'uso tracce di calcare.

Periodicamente può essere quindi utile una pulizia di questi elementi con un buon anticalcare facendo attenzione a sciacquare accuratamente le superfici dopo il trattamento.

Per rimuovere graffi profondi o segni d'usura che possono emergere dopo lunghi periodi d'utilizzo o per urti con oggetti contundenti è anche possibile richiedere l'intervento dei nostri tecnici per una rilevigatura con carte abrasive.
